

ENTERPRISE AND E-BUSINESS SOFTWARE SOLUTIONS

E-SoftSys Fact Sheet

Applying Cutting Edge Technologies through Proven Methodologies

- e-Commerce
- Software Development
- Software Maintenance and Support
- Quality Assurance

Primary Benefit to our Customers:

E-SoftSys unique software development methodology that encompasses onsite requirements analysis and definition, high quality software development, maintenance and quality assurance services enables our Customers to **reduce software development costs and development time significantly, while improving the quality of software applications.**

What We Do:

E-SoftSys provides e-Commerce consulting and full life-cycle development of e-Commerce, web, wireless, multimedia, embedded software and client/server applications to companies in North America, Europe and Asia Pacific.

What Customer Challenges can E-SoftSys address:

- A need to cut the IT budget back and yet get the same level of work to be performed
- Staff retention and training
- A shortage of the right kind of resources
- Programmers who want to work on something new and do not want to maintain current code
- A need to meet project deadlines without hiring any more full time personnel
- Lack of process, methodology and tools to deliver on-time and on-budget
- Lack of effective project management
- Lack of formal Quality Assurance and Testing processes
- A need to develop product enhancements and new modules quickly and inexpensively
- A need to replace legacy applications with applications that use the latest technologies

How E-SoftSys can Help Customers:

- Reduce development time and costs significantly
 - Abundance of highly skilled software professionals, most have an Engineering degree or Master's degree in Computer Applications, many are **Microsoft and Sun Certified**
- Proven methodologies
 - Its consistent and repeatable processes enable E-SoftSys to offer high quality software development, maintenance and quality assurance services to its customers
- Provide highly skilled professionals at a very short notice
- Instant access to system architects and technology experts
- Provide full life cycle software development assistance
 - Project Management - from initial analysis to deployment and support
